

2021 Colette Pinot Noir – Sun Break Wines

Cortell-Rose Vineyard, Eola-Amity Hills AVA, Willamette Valley, Oregon

TTB COLA: 22158001000834 SKU: 00860001391930

Premium quality single-vineyard Pinot Noir consistently excellent from vintage to vintage. Wonderfully complex wine with great flavor intensity and natural acidity. 100% destemmed, Colette is the most fruit forward of our four Pinot Noirs. The grapes are dry farmed, and no herbicides or synthetic fertilizers or pesticides are used.

Accolades: 94 points, Wine Enthusiast, Paul Gregutt for the inaugural 2018 vintage of Colette Pinot Noir (sold out in 10 months). 91 points on Cellar tracker for the 2019 vintage (7/25/22) and 88.5 points on Cellar tracker for the 2020 (smoke) vintage (7/25/22).

Technical Data

Vineyard: Cortell-Rose Vineyard, Eola-Amity Hills AVA, Willamette Valley. Co-owned and managed by Jessica Cortell who farms top-tier organic vineyards such as Seven Springs, Medici, Antica Terra (among others). Jessica chose this exceptional east-facing vineyard as her own for its superb potential and location on volcanic Jory soils at 525-680' elevation and the hallmark cool temperatures of the Eola-Amity Hills due in large part to the winds from the Van Duzer corridor. Vines are planted 5 ft on center, 7 ft row spacing (1,245 plants per acre), using double cordon VSP, at a north/south orientation.

We purchased 16.5 tons of grapes from the vineyard in 2021 to capture the full diversity of the vineyard's six Pinot Noir clones/blocks and the two Jory soil types that are present. ***We are the only winery to make Pinot Noir using all six clones/blocks.***

Vintage: Winter 2020-21 was mild and relatively dry and was followed by one of the driest growing seasons on record, continuing an ongoing drought for Oregon and much of the western US. The Spring was relatively cool, followed by wide swings between early season heat then cool, wet conditions at the end flowering and start of fruit set in June. Heat stress came early in 2021, in late May and early June and late June, then another heat event in the second week of August. Growing degree-day totals for 2021 were the highest over the last four vintages. The combination of cold events in spring, rain during flowering and fruit set, heat events, and a very dry growing season lowered yields in 2021. This vintage also saw low disease pressure, relatively low pest pressure, little to no bird pressure, and a harvest that presented very good to exceptional fruit quality. This resulted in grapes with great flavor and color intensity, but low sugar/ABV with good phenolic ripening and a tad bit lower acidity than previous cooler vintages, but well within the range of balance needed for excellent Pinot Noir.

Tasting notes/Organoleptic profile: Colette is the most fruit-driven of the three Pinot Noirs we produce. *Black raspberry, cherry, cranberry, chocolate, nutshell and pepper aromatics and flavors; a bright and lively mid-palate with mouth-watering acidity, chalky tanins; and an earthy yet fruit-driven, long finish.* Scott Sabbadini, Winemaker, Bjornson Vineyard/Winery

No volatile acidity/ethyl acetate notes. No Brettanomyces-caused volatile phenol compounds.

Grapes/Clones: 100% Pinot Noir grapes-- Pommard, Wädenswil, Dijon 114, 115, 667 and 777 clones picked on Sept. 25 and Sept. 30, 2021.

Fermentation: 100% destemmed grapes without sulfites in 1.5-ton open fermenters (4ft x 4ft x 4.5ft). To reduce the possibility of volatile acidity/ethyl acetate production and add yeast diversity we use a “*pie de cuve*” starter culture from the vineyard to initiate fermentation. We follow this with a cultured yeast inoculation (nonGMO). Gentle punch-downs once a day are undertaken. In 2021 our destemmed fermentations were completed in 12 to 16 days at low temperatures (depending on the clone/fermentation) providing high levels of phenolics.

Élevage/Aging: Aged in older French oak barrels for 11 months. Two “*bâttonages*” (in-barrel lees stirring) and no racking until “*assemblage*”/blending to stainless steel tanks prior to bottling. Malo-lactic fermentation was completed by early December, but we do not add sulfites until Spring for better color stabilization and smoother tannins (anthocyanins and tannin polymerization requires oxygen; and these polymers can further stack together with oxygen to form large colloids, the key to smooth texture). A fungal-derived chitosan (from *aspergillus niger*) is used instead of SO₂ to control for spoilage organisms.

Cross flow filtration: used prior to bottling to control for any potential spoilage organisms.

Closure: We use guaranteed TCA-free Trefino corks from Spain to protect against cork taint and also ensure against premature oxidation. These corks provide guaranteed, very low levels of oxygen ingress.

Release Date and Production: 230 cases, Sept. 2, 2022 bottling.

Company Practices: We are a *One Percent for the Planet* member, donating one percent of all sales to environmental projects including projects that provide 66 tons of carbon offsets. Sun Break Wine and Cider is a small winery consisting of David Patte, owner, wine maker and office/operations manager and clerk, with assistance from his wife Elizabeth and a small amount of seasonal labor at harvest.

Lab Analysis as of July, 2022 (to be updated at bottling):

Titratable Acidity: 5.6 g/L pH: 3.45 Volatile Acidity (Acetic Acid): 0.55 g/L

Free sulfur dioxide: 7 mg/L Molecular SO₂: 0.16 mg/L

Ethanol: 13.5%

Colette

Sun Break Winery produces balanced, elegant Pinot Noir in three distinct styles. *Colette* is the most fruit-focused of the three, featuring cherry and red currant fruit flavors and aromas, and savory and spice notes. I craft *Colette* from hand-picked Wädenswil, Dijon 114, 115, 667, and 777, and Pommard Pinot Noir clones,  WINEMAKER AND OWNER
100% destemmed and vinified in small batches.

GOVERNMENT WARNING: (1) ACCORDING TO THE SURGEON GENERAL, WOMEN SHOULD NOT DRINK ALCOHOLIC BEVERAGES DURING PREGNANCY BECAUSE OF THE RISK OF BIRTH DEFECTS. (2) CONSUMPTION OF ALCOHOLIC BEVERAGES IMPAIRS YOUR ABILITY TO DRIVE A CAR OR OPERATE MACHINERY, AND MAY CAUSE HEALTH PROBLEMS. CONTAINS SULFITES
